# **You Might Be In No Way As Well Younger For The First Schwinn - Jogging Stroller That Is**

Remember when your mom or dad brought home that Schwinn for you? You knew right then that you had a good bike after all, a company doesn't stay in business since the late 1800s unless they make quality products. So you now are developed and it's your turn to purchase your personal child his first Schwinn. Of course in your little tykes case his first Schwinn is a jogging stroller not a bicycle but you know that the same fine workmanship and eye for detail went into this Schwinn jogging stroller as have always gone into all their products. But, I'll bet you didn't know just how great this line of jogging strollers are.

For Mom's

Here are just a few reasons why mom's and dad's love the Schwinn jogging stroller. Mom's love these strollers because they are lightweight and can be folded up with just one hand, making it convenient to hold the baby, and fold the stroller for carrying it up and down stairs. Mom's also appreciate the padded seat which means baby will ride in comfort both on the road and for those little jogs and walks off road as well.

For Dad's

Dad's love the adjustable handles which means that they can jog with their little one without the discomfort of bending over the entire time. They also love the large alloy wheels which means that the Schwinn jogging stroller rolls easily on pavement or on rougher terrain making it possible for dad to get a real jog in instead of having to match his strides to those small wheels that seems to catch on every thing.

For Mom's and Dad's

Both moms and dads are not only thrilled with the dependability and the stability of the Schwinn Jogging Stroller and love the big canopy that keeps the baby from getting overexposed to the sun and the attached zip in rain flap that makes quick work of protecting the baby from those sudden rain showers. They also love the 5 point harness that holds baby safe and secure while they walk or jog along.

Moms and Dads also love the parent trap in which they can easily store wallets and keys as well as the under the seat storage that makes taking along those essential baby items a snap. Most of all parents like the fact that these strollers bear a name they can trust and that was so much a part of their own childhood. It's like being able to share something you loved as a child with your own baby.

But, don't just take these moms and dads word for it. Check out the reviews and you will see that moms and dads all over think the Schwinn jogging stroller is one great way to share the love of the outdoors with their little one.

Please keep in mind however, that although many parents are using the Schwinn jogging stroller with their newborn infants, the Schwinn company itself recommends that your child be 6 months old and older when using this product.
